

iCAN Paediatrics Online Program Objectives

- Understand the importance of nutrition in paediatric patients (ie: Macronutrients, Micronutrients, Electrolytes and Minerals); Identify paediatric malnutrition and its consequences on paediatric patients and overall system burden
- Describe the complexity, safety concerns and potential interactions associated with compounding, as well as with mixing pharmaceuticals with parenteral nutrition; compare the safety advantages of an all-in-one form of parenteral nutrition with the potential of efficacy advantages of individualized parenteral nutrition.
- Understand the purpose of monitoring patients and the monitoring and evaluation required for paediatric patients receiving parenteral nutrition
- Understand the importance and clinical differences between lipid emulsions through a review of the clinical evidence in parenteral nutrition in paediatric populations

2021 iCAN Paediatric EMEA Regional – Agenda

Time	Activity	Speaker
16:00 –16:05	Welcome, Introductions, and Program Objectives	Thibault Senterre, MD, PhD Baxter Medical
16:05 –16:40	Presentation 1 with discussion: <i>Importance of Nutrition</i>	Henrik Arnell, MD, PhD
16:40 –17:15	Presentation 2 with discussion: <i>Compounding Considerations in Parenteral Nutrition</i>	Stephen Tomlin, BPharm, FFRPS, FRPharmS
17:15 –17:50	Presentation 3 with discussion: <i>Importance of Monitoring PN</i>	Henrik Arnell, MD, PhD
17:50 –18:25	Presentation 4 with discussion: <i>Lipids: Demystifying the Science</i>	Henrik Arnell, MD, PhD
18:25 –18:30	Concluding Remarks	Thibault Senterre, MD, PhD Baxter Medical
